LAB EXAM

Syed Arib Ali Naqvi

BCYS-2023S-009

HA Forensics

Desription:

HA: Forensics is an intermediate level of the lab, which gives you a hand on real-life experience in Cyber Forensic Investigation. This lab is completely dedicated to methods and tools of Cyber Forensic Investigation and there is evidence that can be found with various techniques. As it is a Capture-the-Flag, it is very important to note that it is not a root challenge, and comes with a primary motive to find all the flags.

No. of Flags: 4

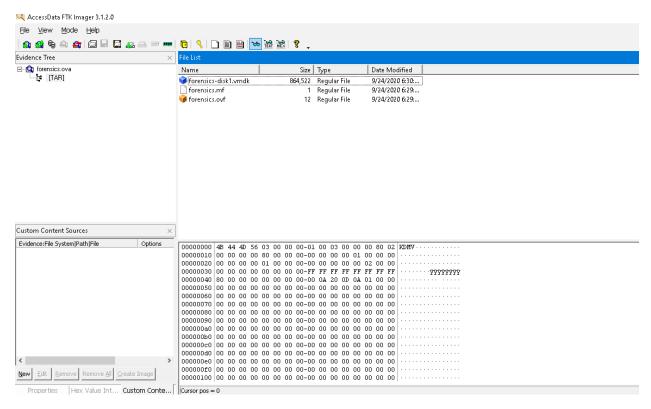

Objective: Find all 4 flags (Getting Root is NOT the objective)

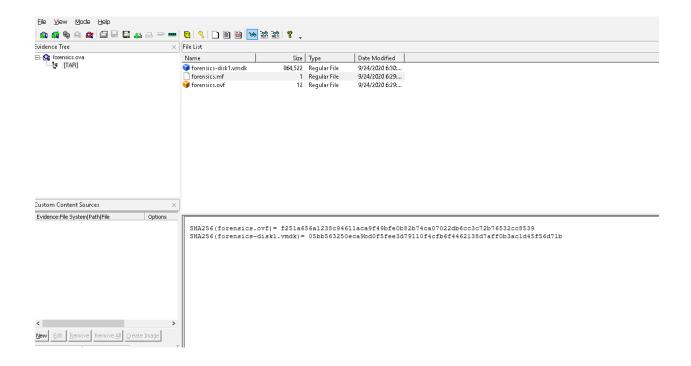

Tools Used:

FTK imager Autopsy

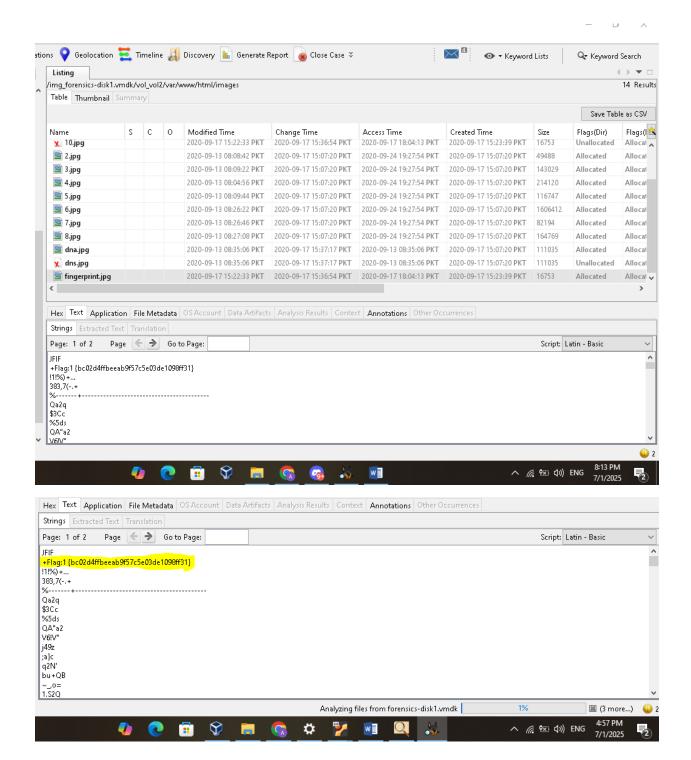

Extracting .vmdk file with FTK Imager

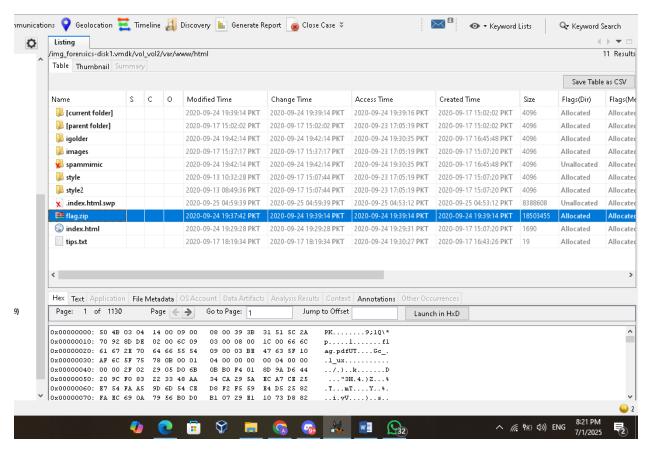

FLAG 1

Flag 1 found in fingerprint.jpg image using autopsy

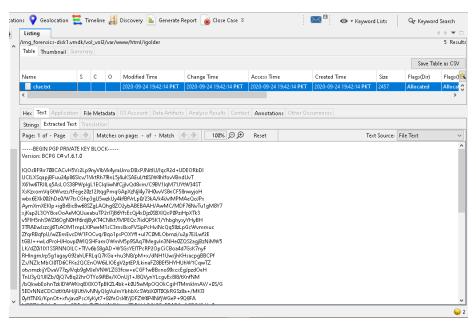

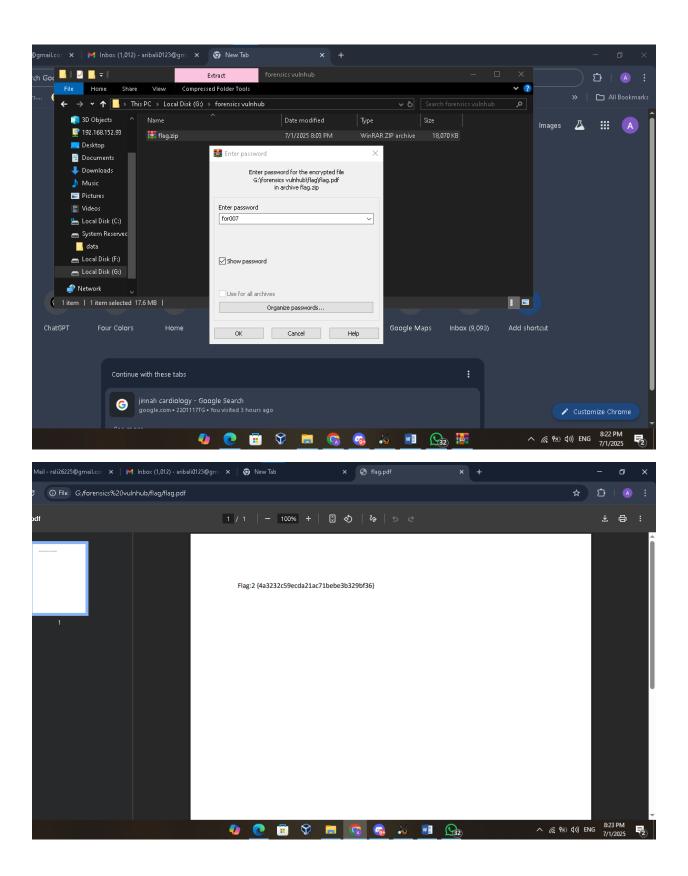

Flag 2

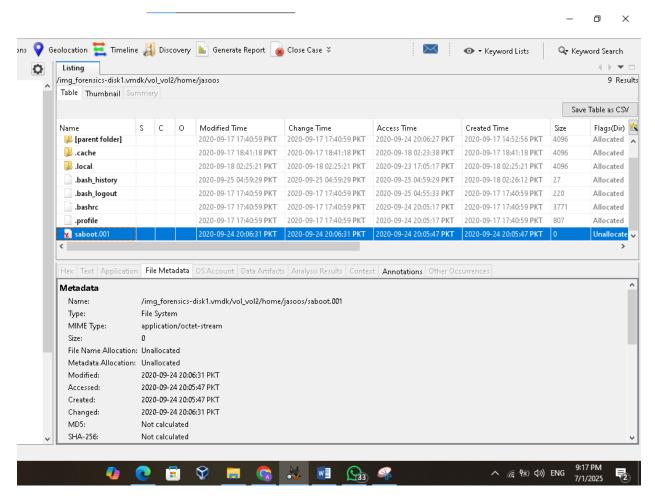

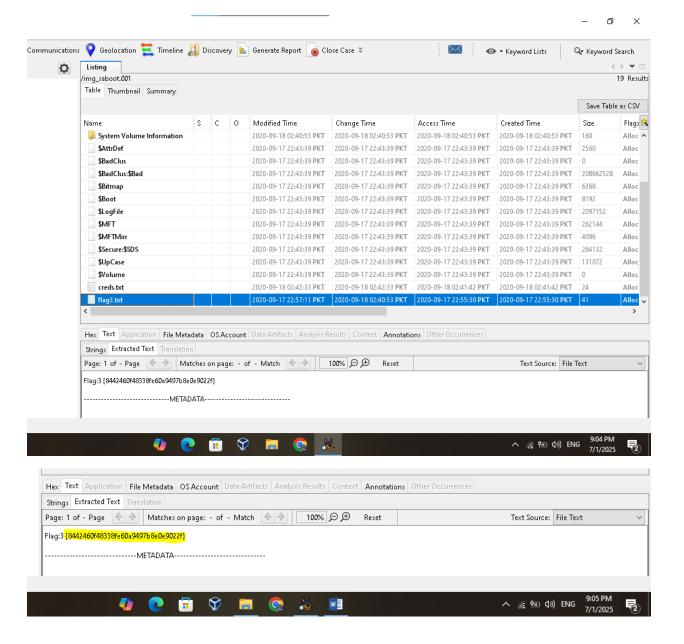

Using clue.txt decrypting it for the password of flag.zip file

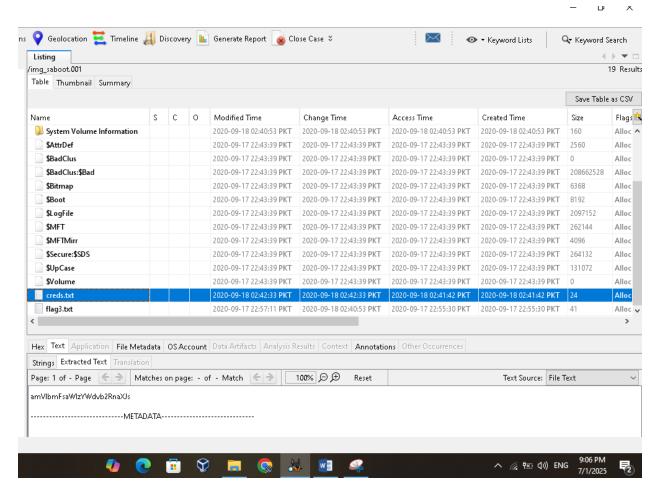

Flag 3
Extracting saboot.001 from the image

Flag 4

Got creds.txt file from saboot.001 file with hash code

Decrypting the code
